

**Brad Audette**

Director Business Development & Sales Support - MTU Maintenance Canada

Brad started his career in 1987 as a systems engineer with Conair Aviation during the development of several new aerial firefighting platforms. He shifted to business development with the growth of Conair's technical services business that led to the establishment of Cascade Aerospace. After 14 years with the Conair Group, Brad took on new challenges which included switching industries in 2003 to join EaglePicher's Canadian site for the supply of specialized military batteries to the US DoD which included working with DLA, Army Research Labs and the Office of the Under Secretary of Defense. Missing aviation, Brad came back into the industry in 2013 and joined MTU in 2015 where he now holds responsibility for business development and execution of military engine programs, sales support of commercial programs and government relations.

Brad holds an engineering degree in Mechanical Engineering from UBC and an EMBA in International Management.

He has been active with AIAC throughout his career, including as a Member of the Board.
