

Dwayne Lucas RCAF BGen (retired), BEng, MSc (Cranfield), PEng, OMM, CD2
Vice President, Special Projects
Aerospace Industries Association of Canada
AIAC

Mr. Lucas is a highly experienced aerospace leader who culminated his RCAF career as the COS Personnel, Training and Support and the DG Aerospace Equipment which included the RCAF technical airworthiness authority. During this time, he was the VP Americas for the Conseil International Sport Militaire (CISM). Following his military career, he joined Cascade Aerospace, a specialty aerospace and defence company. As the EVP/COO, he helped transform the company into an accomplished engineering and maintenance operation focused on customer operational capability. He then went on to focus on R&D being the Western Director for the Consortium of Aerospace Research and Innovation Canada (CARIC) helping develop projects with industry from advanced composites, UAVs, earth observation, AI/ML and pilot fatigue applications. He consults with a number of aerospace companies on strategy and business development. Currently, he is the Aerospace Industry Association of Canada's (AIAC) VP Special Projects, focused on advancing Canada's Aerospace Vision 2025.
